# UNEP/GRID-Warsaw Centre

- Established in 1991.
- Part of the Science Division of the UN Environment Programme's global group of environmental information centres, known as the Global Resource Information Database (GRID) network.
- Supports implementation of UNEP's mission in Poland, including achievement of the 17 Sustainable Development Goals (SDGs) announced in 2015.

# GLOBE Country Coordinator since 1997 (25 years of activity)

# UN Decade on Ecosystem Restoration 2021–2030

- The UN Decade on Ecosystem Restoration aims to prevent, halt and reverse the degradation of ecosystems on every continent and in every ocean.
- Ecosystems support all life on Earth.
- The healthier our ecosystems are, the healthier the planet - and its people.
- The Decade can help to end poverty, combat climate change and prevent a mass extinction. It will only succeed if everyone plays a part.

# What is Ecosystem Restoration?

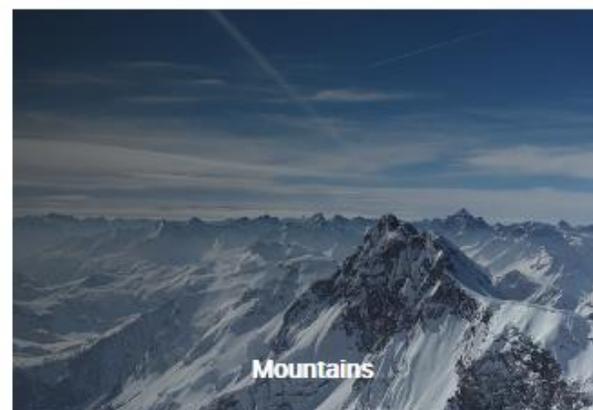

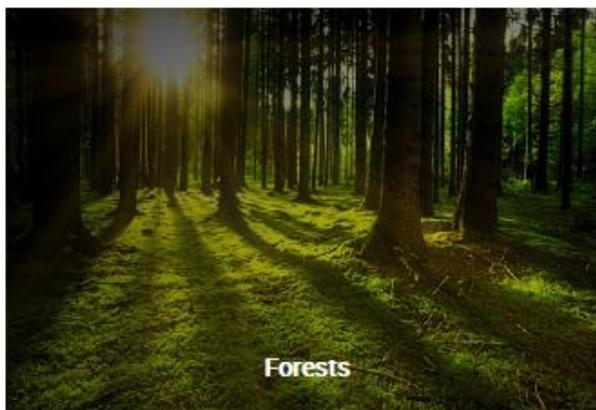

Source: UN Environment Programme,  
<https://youtu.be/XhjN8Xux2I4>

- Ecosystem restoration means assisting in the recovery of ecosystems that have been degraded or destroyed, as well as conserving the ecosystems that are still intact.
- Between now and 2030, the restoration of 350 million hectares of degraded terrestrial and aquatic ecosystems could generate US\$9 trillion in ecosystem services.

# Types of Ecosystem Restoration

UNITED NATIONS DECADE ON  
**ECOSYSTEM  
RESTORATION**  
2021-2030

- Restoring ecosystems large and small protects and improves the livelihoods of people who depend on them.
- It also helps to regulate disease and reduce the risk of natural disasters.

Source: UN Environment Programme

- Restoring ecosystems large and small protects and improves the livelihoods of people who depend on them.
- It also helps to regulate disease and reduce the risk of natural disasters.
- In fact, restoration can help us achieve all of the Sustainable Development Goals.

# How GLOBE community can contribute to the Ecosystem Restoration, supporting the UN Decade on Ecosystem Restoration?

## Data collection to:

- get to know environmental challenges (plan of the restoration)
- help observe/monitor ecosystem changes (effectiveness of the restoration activities)
